

TEMPERATURE AND HUMIDITY SHIELD TECH-SEN RS104

- Allows temperature-humidity measurements to be made by protecting them from the effects of sun and rain.
- Increases the stability of temperature-humidity measurements.
- By providing ventilation of the temperature-humidity sensor, it provides accurate measurement of the outdoor temperature and humidity.
- Made of UV resistant material.
- Two sensors can be mounted.
- Consists of 9 plates.
- With the use of the shield, it provides IP65 protection of the temperature-humidity sensor.

Technical Specifications

Height	280 mm
Outer Radius	234 mm
Weight	1950 g
